NDT

Single or Bi-parting Doors

Flexible Lengths, Widths,  
and Heights

Steel Lead Steel  
Structure

MXR

The PVS-Series X-Ray Vaults are used to inspect large parts and are constructed with modular panels that can easily be assembled on site. If the need should arise, modular vaults can later be reconfigured or relocated within a facility or across the country.

They can be designed to be used with film, Computed Radiography, Digital Radiography or Real Time Imaging. Marietta NDT designs, manufactures, installs and services modular vaults of any size.

# MODULAR X-RAY

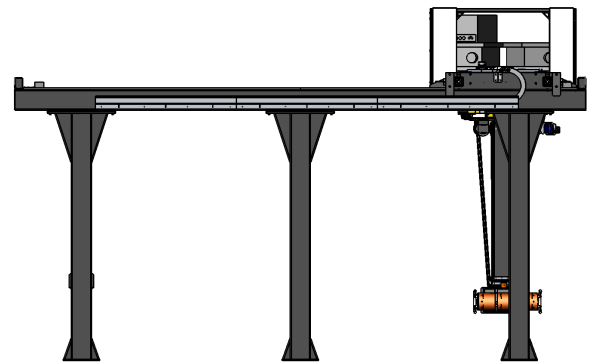

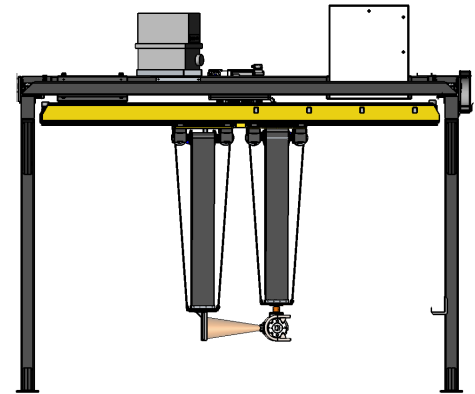

AUTOMATED NDT SYSTEMS

## Standard Features

- Vaults meets 21 CFR 1020.4 requirements
- Includes electrical and lighting systems
